125 kHz Card Programming Information

Format Number	Field Name(s) e.g. Facility Code	Value	QTY	Encoded Start Number	Encoded Stop Number
				Printed Start Number	Printed Stop Number

¹For new artwork files, contact Customer Service for custom artwork number, lead-times, and cost.

October 2019 91 PLT-02630, Rev. B.8

²Cards ordered with plain white front and back packaging, with no HID artwork or with custom artwork, will still have a small "HID logo *** and reference number printed in the lower left-hand corner and a slot punch target printed on the back of the card. The majority of part numbers are marked with sales order number, a custom part number is required to omit all marking from the card. Contact your local support representative for details.

³The Printed card number is placed in the bottom right-hand corner on the back of the card.

⁴Cards are provided with an optional slot punch at no additional charge. Some video imaging printers cannot accommodate pre-slot punched cards. Consult with the printer manufacturer prior to ordering.

⁵Please note that cards shipped within the Americas are always laser-engraved. Inkjetted option is not available for these cards.

^{*}The composite construction is recommended for all cards that will have an over-laminate applied.
